Saturday, 26 September 2026

2026-09-26 00:00–23:59 UTC · all times UTC · data from Binance, Bybit, OKX, Bitget, Gate + Twelve Data

THE DAY IN ONE LINE

Bitcoin and Ethereum edged higher on institutional ETF inflows reversing a year-long deficit, while regulatory clarity emerged on token buybacks and a major exchange suffered a \$75-million theft.

— 01 · PRICE & VOLUME

What every venue's price and volume did

The same two contracts on every exchange, for this UTC day. When the prices line up, nothing unusual is happening; a gap or a big volume difference is worth noticing.

BITCOIN (BTC PERPETUAL)

VENUE	CLOSE	CHANGE	HIGH	LOW	VOLUME
Bitget	\$84,396.30	+0.40%	\$84,416.00	\$83,737.50	\$657M
OKX	\$84,394.10	+0.40%	\$84,440.10	\$83,748.80	\$1.93B
Binance	\$84,405.40	+0.42%	\$84,458.60	\$83,750.00	\$3.05B
Bybit	\$84,393.50	+0.40%	\$84,450.00	\$83,715.20	\$1.50B
Gate	\$84,395.50	+0.41%	\$84,430.60	\$83,743.90	\$1.24B

ETHEREUM (ETH PERPETUAL)

VENUE	CLOSE	CHANGE	HIGH	LOW	VOLUME
Bybit	\$2,695.14	+0.18%	\$2,696.90	\$2,662.45	\$839M
Bitget	\$2,695.19	+0.17%	\$2,696.98	\$2,662.76	\$492M
OKX	\$2,694.85	+0.17%	\$2,696.87	\$2,662.22	\$2.21B

VENUE	CLOSE	CHANGE	HIGH	LOW	VOLUME
Binance	\$2,694.97	+0.16%	\$2,696.77	\$2,662.01	 CS Gorkem T  CS Tamer \$3.05B
Gate	\$2,695.74	+0.20%	\$2,696.49	\$2,663.26	\$1.49B

ALTCOINS

COIN	CLOSE	CHANGE	HIGH	LOW	VOLUME
SOL Solana	\$121.34	-0.53%	\$122.42	\$119.78	\$1.50B
XRP XRP	\$1.5264	-2.63%	\$1.5804	\$1.5006	\$837M
BNB BNB	\$773.75	-0.47%	\$778.54	\$767.03	\$157M
DOGE Dogecoin	\$0.09667	-2.25%	\$0.09967	\$0.09524	\$365M
ADA Cardano	\$0.2538	-1.78%	\$0.2655	\$0.2474	\$202M
AVAX Avalanche	\$10.835	+1.80%	\$11.129	\$10.505	\$204M
LINK Chainlink	\$14.137	+1.62%	\$14.499	\$13.856	\$246M
SUI Sui	\$1.1626	-2.65%	\$1.2045	\$1.1283	\$435M

Bitcoin and Ethereum prices tracked closely across all five exchanges, showing broad market agreement. Binance dominated Bitcoin volume at \$3.05 billion, while OKX and Binance split Ethereum volume nearly evenly at around \$2.2–2.9 billion each.

02 · POSITIONING

How traders were leaning

Funding shows which side is paying to hold its position (positive = longs pay shorts). Open interest is how much money is in open bets; its change over the day shows money coming in or out. Long/short is how many accounts lean each way.

BITCOIN

VENUE	FUNDING (ANN.)	OPEN INTEREST	OI CHANGE	LONG/SHORT	MARK
Bitget	+2.6%	\$2.68B	—	—	\$84,407.00
OKX	-1.0%	\$2.38B	—	1.28	\$84,394.50
Binance	+5.1%	\$7.98B	—	1.30	\$84,409.56
Bybit	+11.0%	\$4.81B	—	—	\$84,397.59
Gate	-1.6%	\$4.69B	—	—	\$84,389.91

ETHEREUM

VENUE	FUNDING (ANN.)	OPEN INTEREST	OI CHANGE	LONG/SHORT	MARK
Bybit	+11.0%	\$2.13B	—	—	\$2,695.40

VENUE	FUNDING (ANN.)	OPEN INTEREST	OI CHANGE	LONG/SHORT	MARK
Bitget	+11.0%	\$2.10B	—	—	 CS Gorkem T  \$2,695.49
OKX	+3.2%	\$1.59B	—	1.36	\$2,694.90
Binance	+6.3%	\$6.13B	—	2.71	\$2,695.37
Gate	+5.1%	\$2.52B	—	—	\$2,694.77

Funding, open interest and mark price are point-in-time (as of 00:00 UTC), not daily figures.

Funding rates for both assets turned positive across most venues (meaning traders taking long positions paid a small fee to those shorting), ranging from +2.6% to +10.95% annualized on Bitcoin. Long traders outnumbered short traders on both coins—especially Ethereum on Binance with a 2.7:1 ratio of longs to shorts. Open-interest positioning remained heavy toward longs. Fear & Greed sentiment slipped from 74 (high greed) to 70 (greed), suggesting a slight pullback in conviction, though the market remained in greed territory.

03 · BIGGEST MOVERS

September 26 was a Saturday; equity and Asian markets were closed for the weekend. Perpetual futures on stocks tracked their prior closes but do not reflect live trading.

05 · MARKET NEWS

What drove the market — and what didn't

Only causes that move prices, each with its source. Rumours and unconfirmed reports are kept separate at the end.

THE THREE THAT MATTERED MOST

Bitcoin ETFs turn positive for 2026 with \$2.4 billion weekly inflow

Spot Bitcoin ETFs drew \$2.4 billion in the week ending September 26, their largest weekly intake since October 2025. This reversed a nine-month deficit: Bitcoin ETFs sat roughly \$5.8 billion in the red just two months ago but have now pushed 2026 year-to-date flows back above zero. The seven-day winning streak came as institutions rotated back into crypto.

SEC clears regulatory hurdle as crypto token buybacks hit record \$638 million

The SEC issued guidance clarifying that promoting a network's current uses generally does not create an expectation of profit—a significant approval for projects conducting token buybacks. Crypto projects spent a record \$638 million on buybacks through late August 2026, up from \$545 million in the same 2025 period, showing accelerating institutional investment in protocol sustainability.

Kalshi loses appeal over Ohio and Tennessee sports betting laws

A federal appeals court ruled that Kalshi's sports-event prediction contracts are not swaps under the Commodity Exchange Act and therefore remain subject to state gambling laws. The decision widens a circuit split and raises the prospect of a Supreme Court case, limiting the prediction market's ability to operate across state lines without compliance exceptions.

REGULATION AND POLICY

Fed stablecoin proposal would make circulation a capital cost for supervised issuers

The Federal Reserve proposed new rules for payment stablecoin issuers it supervises, requiring operators to hold capital for operating risk—estimated at \$20 million annually for a \$1 billion stablecoin with no non-reserve revenue. The proposal raises the bar for stablecoin operators under Fed oversight.

Stablecoins (USDC, others) · Sept 26, 03:22 UTC · [CryptoSlate](#)

INSTITUTIONAL FLOWS AND ETFs

Bitcoin ETFs Notch Seven-Day Winning Streak as 2026 Flows Turn Green

Bitcoin spot ETFs drew nearly \$3 billion over seven straight trading sessions, erasing losses from the failed Clarity Act in September and returning year-to-date flows to positive. The streak reflects sustained institutional re-entry into spot exposure.

EXCHANGE AND PLATFORM CHANGES

Binance deal gives Circle a boost in stablecoin race with Tether

Binance announced a five-year partnership with Circle, taking a \$100 million equity stake and committing to a USDC deal. Analysts said the move could strengthen Circle's reach in emerging markets, though Tether's liquidity advantage remains difficult to match.

Kraken's parent Payward is betting billions on becoming financial infrastructure

Payward (Kraken's parent) announced a strategy to unify trading, payments, asset management, and institutional services across a single backend. Co-CEO Arjun Sethi framed the move as pivoting from a crypto exchange toward full financial infrastructure.

Solana's 150-millisecond settlement upgrade reaches second public test network

Solana's Alpenglow upgrade, aimed at cutting settlement times to 150 milliseconds, is now running on both public test networks. The upgrade gives application teams time to test integrations before it goes live on the main blockchain.

XRP Ledger's Batch upgrade slips to Oct. 9 after validator support resets

The XRP Ledger's proposed Batch upgrade—which would bundle up to eight transactions including asset and payment transfers—was delayed to October 9 when validator support briefly dropped below the 80% threshold, restarting the two-week activation clock.

XRP · Sept 26, 19:30 UTC · [CoinDesk](#)

HACKS, EXPLOITS AND OUTAGES

Bitget hacker moves \$83 million in stolen XRP that Ripple cannot freeze

Two days after Bitget disclosed a security breach, the attacker began moving the stolen XRP across wallets—draining about \$75 million from the five original holding accounts. Because XRP is not reversible on-chain like USDC (which Circle and Tether can freeze on their network), Ripple has no direct way to halt the transactions.

Nearly \$15 billion is moving off LayerZero, now a \$292 million lawsuit puts its security model on trial

KelpDAO's parent company Evercrest sued LayerZero Labs and CEO Bryan Pellegrino over April's \$292 million rsETH exploit. The suit challenges LayerZero's multi-signature security architecture, and concurrent \$15 billion in assets are leaving the network—a sign of eroded trust.

— 07 · GLOSSARY

Every term used today, in plain words

basis — The type of time period used for calculating daily returns: 'utc-day' means 00:00–23:59 UTC; 'rolling-24h' means the previous 24 hours from the snapshot time.

Fear & Greed Index — A 0–100 sentiment gauge measuring market mood: 0–20 = extreme fear, 20–40 = fear, 40–60 = neutral, 60–80 = greed, 80–100 = extreme greed. Based on volatility, momentum, social media, and Google search trends.

funding rate — A periodic payment between long and short traders on perpetual futures contracts. If positive, longs pay shorts (market tilted bullish). If negative, shorts pay longs (market tilted bearish). Expressed as an annualized percentage.

liquidation — Forced closure of a leveraged position when the margin (collateral) falls below the exchange's minimum. A trader's position is sold at market price, sometimes at a loss.

long / short position — Long: betting the price will go up (holding or buying). Short: betting the price will go down (selling or borrowing-to-sell). A long/short ratio of 1.3 means there are 1.3 longs for every 1 short.

mark price — The reference price used to calculate funding payments and margin on perpetual futures. Usually close to the spot price but may differ slightly to prevent manipulation.

open interest — The total value of all open positions (longs and shorts) in a perpetual contract. Rising open interest signals increasing leverage and conviction; falling open interest signals de-risking.

perpetual futures (perps) — Leveraged contracts that track a cryptocurrency or stock price but never expire (unlike traditional futures). Traders can hold positions indefinitely, paying periodic funding rates.

spot market — The cash market where you buy and hold an actual asset at today's price, as opposed to futures where you agree to a price for future delivery.

swap — In finance, a contract exchanging one cash flow for another (e.g., fixed for floating interest). In regulatory terms, 'swaps' have specific oversight requirements; some crypto contracts are debated whether they are 'swaps' or not.
