02 · POSITIONING

How traders were leaning

Funding shows which side is paying to hold its position (positive = longs pay shorts). Open interest is how much money is in open bets; its change over the day shows money coming in or out. Long/short is how many accounts lean each way. Top L/S is the ratio among the largest traders. Taker B/S is the buy-to-sell ratio of market orders.

Equities and commodities traded on Binance

Binance lists tokenised perpetuals for stocks (Korea, Hong Kong, China and the US) and commodities. The perp trades nearly around the clock, but the underlying market is open only a few hours — when it was closed, that is noted instead of showing drift as a daily move.
