

**DAILY MARKET REPORT**

# Tuesday, 15 September 2026

2026-09-15 00:00–23:59 UTC · all times UTC · data from Binance, Bybit, OKX, Bitget, Gate + Twelve Data

**THE DAY IN ONE LINE**

Bitcoin and Ethereum both fell 3–4.5% on September 15 as the U.S. Senate failed to advance crypto-market regulation (the Clarity Act) and traders prepared for an expected Federal Reserve interest-rate decision.

**01 · PRICE & VOLUME**

## What every venue's price and volume did

The same two contracts on every exchange, for this UTC day. When the prices line up, nothing unusual is happening; a gap or a big volume difference is worth noticing.

**BITCOIN (BTC PERPETUAL)**

| VENUE   | CLOSE      | CHANGE | HIGH       | LOW        | VOLUME   |
|---------|------------|--------|------------|------------|----------|
| Bitget  | \$75,608.2 | -3.26% | \$78,229.9 | \$74,910   | \$4.01B  |
| OKX     | \$75,611.2 | -3.26% | \$78,230.7 | \$74,896.6 | \$9.48B  |
| Bybit   | \$75,608   | -3.26% | \$78,226.1 | \$74,919.6 | \$6.82B  |
| Binance | \$75,599.9 | -3.27% | \$78,223.3 | \$74,909.4 | \$18.23B |
| Gate    | \$75,610.3 | -3.26% | \$78,222   | \$74,902.3 | \$7.62B  |

**ETHEREUM (ETH PERPETUAL)**

| VENUE   | CLOSE      | CHANGE | HIGH       | LOW        | VOLUME   |
|---------|------------|--------|------------|------------|----------|
| Bybit   | \$2,396.84 | -4.67% | \$2,518.6  | \$2,356.05 | \$4.15B  |
| Bitget  | \$2,397.1  | -4.67% | \$2,519.05 | \$2,356.53 | \$3.15B  |
| OKX     | \$2,397.08 | -4.66% | \$2,518.73 | \$2,356.18 | \$10.73B |
| Binance | \$2,397.15 | -4.64% | \$2,518.6  | \$2,357    | \$14.32B |
| Gate    | \$2,397.14 | -4.67% | \$2,518.81 | \$2,356.58 | \$8.13B  |

Bitcoin and Ethereum prices fell consistently across all major trading venues on September 15, with Bitcoin ending near \$75,600 (down 3.3% for the day) and Ethereum at \$2,397 (down 4.6%). Binance led in trading volume, with Bitcoin at \$18.2 billion and Ethereum at \$14.3 billion in USD trading that day.

02 · POSITIONING

## How traders were leaning

Funding shows which side is paying to hold its position (positive = longs pay shorts). Open interest is how much money is in open bets; its change over the day shows money coming in or out. Long/short is how many accounts lean each way.

### BITCOIN

| VENUE   | FUNDING (ANN.) | OPEN INTEREST | OI CHANGE | LONG/SHORT | MARK       |
|---------|----------------|---------------|-----------|------------|------------|
| Bitget  | +7.3%          | \$2.53B       | —         | —          | \$75,742.3 |
| OKX     | +6.5%          | \$2.12B       | —         | 1.79       | \$75,735.9 |
| Bybit   | +1.8%          | \$4.28B       | +4.6%     | —          | \$75,737.5 |
| Binance | +3.6%          | \$8.14B       | +0.4%     | 1.82       | \$75,740.2 |
| Gate    | -4.9%          | \$4.99B       | —         | —          | \$75,751.6 |

### ETHEREUM

| VENUE   | FUNDING (ANN.) | OPEN INTEREST | OI CHANGE | LONG/SHORT | MARK       |
|---------|----------------|---------------|-----------|------------|------------|
| Bybit   | -8.8%          | \$1.85B       | -3.8%     | —          | \$2,398.2  |
| Bitget  | +4.7%          | \$1.78B       | —         | —          | \$2,398.34 |
| OKX     | +1.8%          | \$1.50B       | —         | 2.13       | \$2,398.4  |
| Binance | -0.6%          | \$5.56B       | -4.8%     | 3.26       | \$2,398.25 |
| Gate    | +3.5%          | \$2.77B       | —         | —          | \$2,398.51 |

Funding, open interest and mark price are point-in-time (as of 01:00 UTC), not daily figures.

Bitcoin funding rates remained mostly positive but modest (1.8% to 7.3% annualized depending on venue), signaling moderate bullish positioning that weakened as the day went on. Ethereum funding rates were mixed, with some venues showing negative rates (Bybit -8.8%), indicating uncertainty. Open interest declined on Ethereum (down 3.8-4.8% depending on venue) while Bitcoin open interest held roughly flat or slightly higher, suggesting traders closed Ethereum positions but held Bitcoin. Long positions outnumbered shorts across major venues (Bitcoin 1.8:1 to 1.82:1 ratio, Ethereum 2.13:1 to 3.26:1), but the size of total positions shrank.

03 · BIGGEST MOVERS

## The coins that moved the most

The largest moves on Binance for this UTC day, with the reason where the news supports one.

**AKEUSD** +70.0% · \$475M vol · on [Binance](#)

AKE surged 70% with \$475 million in trading volume. No clear public catalyst; the jump coincided with general crypto trading volatility on the day of the Clarity Act vote.

**BRUSD** -52.8% · \$234M vol · on [Binance](#)

BR crashed 53%, trading \$234 million in volume. No identifiable news or announcement triggered the decline.

**AINUSD** +34.5% · \$369M vol · on [Binance](#)

AIN climbed 34.5% with \$369 million in volume. No disclosed reason or announcement drove the move.

Asian equity markets declined on September 15. Korean stocks (trading 00:00–06:30 UTC) fell across technology: SK Hynix –0.6%, Samsung Electronics –1.2%, Hanmi –4.1%, Hyundai Motor –4.6%, and Naver –2.9%. Hong Kong stocks (trading 01:30–08:00 UTC) showed steeper losses in AI companies: Zhipu AI –8.7%, MiniMax –9.9%, and Xiaomi –3.2%. Mainland China equities (01:30–07:00 UTC) saw modest moves: Unitree Robotics +0.9%, CXMT +0.3%. US equities (session ended before 15:30 UTC on Sept 15) closed lower: S&P 500 (SPY) –0.46%, Nasdaq Composite (ONEQ) –0.78%. The U.S. dollar edged up +0.18% as investors sought safe assets ahead of the Fed decision. Commodities were mixed: WTI Crude Oil +2.18%, Brent Crude +1.04%, Copper +0.75%, but Gold –0.32%.

05 · MARKET NEWS

What drove the market — and what didn't

Only causes that move prices, each with its source. Rumours and unconfirmed reports are kept separate at the end.

THE THREE THAT MATTERED MOST

U.S. Senate rejects Clarity Act in procedural vote; crypto regulation stalls

The Senate voted 49–50 on a procedural motion to advance the Clarity Act, falling 11 votes short of the 60 needed. The bill would have split U.S. crypto oversight between the SEC and CFTC. Democrats opposed the measure, joined by Republican Senators Susan Collins (Maine), Josh Hawley (Missouri), Jerry Moran (Kansas), and Thom Tillis (North Carolina). The vote killed the crypto industry's marquee regulatory push, at least for now.

Federal Reserve widely expected to raise rates on September 16; traders price in hike

Market expectations solidified for a 0.25% interest-rate increase at the Fed's September 16–17 decision, announced Wed. Sept 16 at 18:00 UTC. Fed Chair Kevin Warsh's recent Jackson Hole speech raised confidence in a hike. Rising Treasury yields and concerns about inflation — partly driven by supply-chain disruptions linked to Middle East tensions — increased the odds to 66%+ in prediction markets. Higher rates typically reduce appetite for risk assets like Bitcoin.

DOJ charges two Robinhood engineers with insider trading on Hyperliquid

The U.S. Department of Justice charged Hefu Chai, 36, and Huaisong Xiang, 30 — both former Robinhood engineers — with commodities fraud and wire fraud. They allegedly accessed confidential information about upcoming Robinhood Crypto listings and used it to trade futures on Hyperliquid between 2025 and 2026, profiting more than \$50,000 each. The charges carry maximum sentences of 10 years (commodities fraud) and 20 years (wire fraud).

## REGULATION AND POLICY

### Inside the political breakdown that sank the Clarity Act

Behind-the-scenes disputes over ethics provisions tied to President Trump's personal crypto wealth doomed negotiations. Republican senators pushed back against Democratic demands for expanded ethical review, and the final text could not satisfy both camps. The failure leaves U.S. crypto regulation in limbo.

BTC, ETH, all crypto · Sept 15, hours before vote · [CoinDesk](#)

### Crypto stocks sink on Clarity Act failure; Coinbase, Circle lead selloff

Crypto-related equities fell sharply after the Senate vote. Coinbase and Circle shares dropped roughly 10%, alongside declines in Bitcoin miners and crypto treasury companies. The failed regulation vote wiped out optimism that had built up over the legislative push.

COIN (Coinbase), CIRC (Circle), crypto stocks · Sept 15, during and after the vote · [CoinDesk](#), [Cointelegraph](#)

### Elizabeth Warren vows to pursue crypto regulation despite Clarity Act defeat

The U.S. Senator said she remains committed to crypto legislation but rejected the Clarity Act as drafted, saying it does not address her consumer-protection concerns. She signaled intent to craft an alternative bill.

BTC, ETH, all crypto · Sept 15, hours after the vote · [The Block](#)

### Stand With Crypto warns senators: votes against Clarity Act will be scorecarded for 2026 midterms

The Coinbase-backed advocacy group pledged to add senators' Clarity Act votes to its voter scorecards as it mobilizes crypto voters ahead of the November 2026 election. The group vowed accountability for those who voted no.

## — 07 · GLOSSARY

## Every term used today, in plain words

**Annualized funding rate** — The rate (expressed as a yearly percentage) that traders who hold long positions pay to traders who hold short positions in perpetual futures contracts. If the rate is positive, longs pay shorts. A high funding rate often signals strong bullish sentiment (too many longs), while a negative rate signals bearish sentiment (too many shorts).

**Basis** — The calendar day or date used to calculate a price movement. 'utc-day' means the day is calculated from 00:00 to 23:59 UTC. 'rolling-24h' means the data covers the most recent 24 hours from the time of measurement.

**Cloture vote** — A procedural Senate vote to end debate and force a final vote on a bill. It requires 60 votes to pass. If cloture fails, the bill cannot move forward to a final vote.

**Funding rate** — In perpetual futures markets, an interest rate paid between traders to keep the perpetual price in line with the spot price. See 'annualized funding rate' for the yearly equivalent.

**Long/short ratio** — The ratio of long positions (bets that price will rise) to short positions (bets that price will fall) among traders in a market. A ratio above 1.0 means more longs than shorts, typically signaling bullish sentiment; below 1.0 means more shorts.

**Mark price** — The reference price used in perpetual futures markets, calculated as a weighted average of spot prices across exchanges. Funding payments are based on mark price to prevent manipulation.

**MEV (maximal extractable value)** — Profit that a miner or validator can earn by reordering, inserting, or withholding transactions in a block. MEV bots scan mempool transactions and can front-run (trade ahead of) pending orders to profit from price movements.

**Open interest** — The total number of outstanding (unsettled) futures or perpetual contracts in a market. Rising open interest suggests increased leverage and positioning; falling open interest suggests traders are closing positions or taking risk off.

**Open-interest change** — The percentage increase or decrease in total open interest over a given period (in this report, the calendar day). Positive change means more positions were opened than closed; negative means more closed than opened.

**Perpetual futures contract** — A derivative contract that allows traders to bet on price movements without an expiration date, unlike traditional futures. Perpetuals can be held indefinitely and include funding-rate payments to keep the price aligned with spot.

**Spot price** — The current market price of an asset for immediate delivery (as opposed to futures, which are contracts for delivery in the future).

**Tokenized assets** — Traditional financial securities (stocks, bonds, commodities) or real-world assets converted into blockchain-based tokens. Tokenized assets can be traded 24/7 on crypto platforms and may offer higher yield or lower fees than traditional settlement.

**Volume** — The total dollar value (or number of contracts) traded in a market over a given period. Higher volume typically indicates more confidence in price discovery and liquidity.
